Autumn 2012

CRP 3500: The Socially Just City
Ndungu

Too many cities are split between the haves and the have-nots. Explore how to reduce poverty, increase access to public services, and create a high quality of life for all residents.

CRP 3600: Land Development Planning
Hanlon

Planners shape cities. The land development process requires understanding the impacts of new development and redevelopment in order to reimagine more vibrant sites.

CRP 4430: Gentrification in the City Workshop
Hanlon

This course examines the process of gentrification in the city. We will explore the different definitions of gentrification as well as the varied explanations of why gentrification happens in certain neighborhoods. Readings and field trips in this course will 1) explore the relationships between gentrification and issues of race, ethnicity, gender and sexual orientation; and 2) consider the role of planning and policy in the gentrification process.

CRP 4430: Workshop in City and Regional Planning

New trends, techniques and processes in planning are generated on a continual basis. This workshop explores the latest advances in planning.

CRP 4597: The Global Environment in Planning
Ndungu

A review of challenges in developed and developing countries, examining planning issues associated with economic development, social equity, growth and rural development.
CRP 5001: Introduction to GIS
Acey

Introduction to the basic principles of geographic information systems and their use in spatial analysis and information management.

CRP 5200: Metropolitan and Regional Planning
Taylor

Cities and towns are becoming increasingly dependent on each other. Progressive approaches to regional planning directly influence the economy and quality of life.

CRP 5420: Planning Places with People in Mind
Nasar

People experience places in many ways. Design, plan and manage places of different types and scales to create quality experiences for the public.

CRP 5500: Energy Planning
Burton

Energy makes cities run, from renewable and non-renewable sources. Energy is a driving opportunity and constraint in urban development.

CRP 5700: Urban Transportation Demand Forecasting
Viton, Mishalani

Introduction and applications for quantitative demand forecasting in urban transportation.

CRP 5800: Microfinance for Planners
Acey

Why and how microfinance operations have grown to provide financial services to poor and low-income people on a sustainable basis.
